SARS-CoV-2 (COVID-19) Test Result

Date 02-05-2021

Time 21:28:23

Scan the code by your camera to match the result and
Press the link

| Transaction | ID/Passport # | Patient Name | Age | Gender | Test Date | Result |
|-------------|---------------|---------------|------------|--------|------------|----------|
| 109957 | A14705113 | عباس عدي عباس | 11 Year(s) | Male | 02-05-2021 | Negative |

- A negative result doesn't exclude the possibility of COVID-19, especially in early disease
- Positive result is indicative of active infection with SARS-CoV-19
- A negative result doesn't preclude SARS-CoV-19 infection and should not be used as a sole basis for the treatment or other patient management decision, so negative result
- must be combined with patient history, and clinical suspicion
- Optimum specimen type and timing for peak viral load during infection has not been determined
- False negative result may occur if the specimen improperly collected, inadequate number of organism or amplification inhibitors are present in the specimen
- The above result for SARS-CoV-2 was done by Real Time PCR Technology
- The lab is not responsible for flights cancellation
